

## Choice Maps

FOUNDATIONS\_10\_1352015487625913

**Definition 0.1.** Let  $X$  be a system of nonempty sets. A choice map for  $X$  is a map  $g$  such that  $\text{dom}(g) = X$  and  $g(x) \in x$  for any  $x \in X$ .
