

Cofinality

SET_THEORY_06_5621203645212879

Definition 0.1. Let κ be a cardinal and $Y \subseteq \kappa$. Y is cofinal in κ iff for every $x \in \kappa$ there exists a $y \in Y$ such that $x < y$.

Let a cofinal subset of κ stand for a subset of κ that is cofinal in κ .
